

About this Vault

05 May 2026, 2 min read

The single source of truth for all policies operated by **Nudge Education Ltd**, including the online provision **Nudge Education Online (NEO)**.

This site is built from an Obsidian vault published with **Quartz**². Every policy is authored in markdown with structured frontmatter, then rendered as a connected, searchable website.

Provisions covered

- **Nudge Education Ltd** (Company Number 10192753) — the parent company, operating face-to-face interventions across the UK
- **Nudge Education Online (NEO)** — the fully online alternative provision, launching September 2026

Architecture

Where Nudge Education already holds a canonical policy and NEO requires online-specific provisions, those provisions appear as an **NEO Online Addendum** block at the end of the canonical policy — not as a duplicate document. This means:

- **One canonical policy** per topic
- **One approval trail** per topic
- **One version** for LAs to verify
- **NEO-specific online content** clearly marked but not separated

Genuinely online-specific policies (where Nudge Education has no parent equivalent — Online Safety, AI Policy, Home-School Agreement, Teaching & Learning, Behaviour & Regulation) live in the **NEO Online section**.

Browse

- **Home** — start here
- **Commissioner Pack** — for LA commissioning officers
- **Parents & Carers Pack** — for families

- **Tag Taxonomy** — how policies are classified
- **Change Log** — vault build history

Tag taxonomy in brief

Every policy carries frontmatter with these fields:

Field	Purpose
audience	internal / external / both — drives public vs internal visibility
groups	which staff/audience groups need this policy (drives induction packs)
provision	nudge-education / neo / haven / all
type	core / addendum / standalone-neo / inactive-neo
status	live / draft / archive
version	current version marker
owner_role	role responsible for the policy
source_file	original document path for audit trail

See **the full taxonomy** for details.

Status

Vault built April 2026. See the **change log** for ongoing work.
